HB6618 - "An Act Concerning Medical Assistance for Certain Persons Receiving Abortion Care and Related Services in Connecticut"

The viewpoints of the Connecticut Catholic Conference are right on. I have a relative who needs mental care, but he can't get it.

Another relative had to go to the emergency room and is still paying the bills he received and he works!.

The citizens of Connecticut should be the only one to receive funds. Most abortions are elective procedures, It certainly is not child care. Frankly, I don't want to pay for any procedure that kills, period. Whether it is for OUR citizens or CERTAIN PERSONS.

Right now we are pretty broke. Our governor is only thinking of his political plans for his party.

First you try to get rid of clinics that are trying to help woman make hard decisions about their unborn baby and give them ALL their options. They should be told the truth. Unborn babies aren't a bunch of cells. A relative of mine fell for that line over 40 years ago and still suffers when she found out the truth. Why are we making it so easy for women to have abortion?

Now, you want us to pay for immoral acts people from out of state want done? There is enough fraud happening in the programs we already pay for.

There are many more who feel like me because we have to pay \$5 /per dozen for eggs. We pay a lot for electricity. Your citizens need help!

THIS IS A BAD IDEA!
